Delaware DNREC Div. of Soil & Water Conservation 89 Kings Hwy. Dover, DE 19901

Phone: (302)739-9921 FAX: (302)739-6724

# STANDARD PLAN UTILITY CONSTRUCTION

FOR EROSION AND SEDIMENTATION CONTROL ONLY

#### REQUIRED FOR CONSTRUCTION DISTURBING OVER 5000 SQUARE FEET

NOT VALID UNTIL APPROVED BY DNREC DIVISION OF SOIL AND WATER CONSERVATION

#### **LOCATION**

(zip)
ne
ne
ect (ft.)

#### **FEES**

- The review and inspection fee is \$80.00 per disturbed acre (\$20.00 Minimum) prorated at 0.1 acre increments. Submit payment at time of application. Make checks payable to: Division of Soil & Water Conservation.

### **CONDITIONS OF APPROVAL**

- This Standard Plan Application may be submitted instead of a detailed plan when the Standard Plan Criteria of Section 11 of the Delaware Sediment and Stormwater Regulations are met.
- Project is linear in nature with earth disturbance less than ten (10) feet in width and surface restored to original condition.
- Separate approval may be required from the DNREC relating to work in wetlands or subaqueous lands.
- The approval of this plan does not relieve the applicant from complying with any and all Federal, State, County or Municipal laws and regulations.
- In the event the applicant fails to provide adequate sediment control under the provisions of this Standard Plan, the DNREC, Division of Soil & Water Conservation reserves the right to require additional control measures as necessary **OR require** the preparation and implementation of a site specific plan.

- The DNREC, Division of Soil & Water Conservation shall approve Standard Plan requests within 14 calendar days of receipt.
- The applicant shall notify the DNREC, Division of Soil & Water Conservation at least five days prior to beginning construction. Phone (302) 739-9921.
- Applies only on projects that are not contained within a broader Sediment and Stormwater Management Plan that has been approved for a concurrent development project.
- "I/We hereby certify that I/We have the authority to make this application; that I/We have read and understand the above conditions; that I/We shall cause all land clearing, grading, and or development to be done pursuant to all limitations and conditions set forth by this agreement; that I/We authorize the right of entry for periodic on-site inspections by the State of Delaware, Department of Natural Resources and Environmental Control compliance personnel and/or their authorized agents."

## **GRADING**

- Existing sediment and stormwater control measures for concurrent site development shall be repaired by the utility contractor if they are damaged by the utility contractor.
- At any location where sediment laden run-off may exit the property, perimeter controls will be installed to prevent sediment from being transported off-site.
- Any sediment transported off-site to roads or road rights-of-way including ditches shall be removed. Any damage to ditches shall be repaired and stabilized to original condition.
- Grading shall not impair surface drainage, create an erosion hazard or create a source of sediment to any adjacent watercourse or property owner.
- Local grading requirements may supplement these grading conditions.

## **STABILIZATION**

- Following initial soil disturbance or redisturbance, temporary or permanent stabilization with seed and mulch shall be completed within 14 calendar days to the surface of all disturbed areas not actively under construction.
- Specific stabilization recommendations may be found in the Delaware Erosion and Sediment Control Handbook.
- Swales or other areas that transport concentrated flow will be stabilized with erosion control matting or sod.

### **SPECIFICATIONS**

 Specifications for all erosion and sediment control practices are contained in the current Delaware Erosion and Sediment ControlHandbook.
